Transfer Confirmation Email

The Administrative Contact for the domain name for which a transfer is requested will receive the following email:

```
=====
DOMAIN NAME TRANSFER - Initial Authorization for Registrar Transfer
=====

Re: Transfer of <Domain Name>

We received a request on 00/00/0000 to become the new registrar of record for the
listed domain(s) .

You have received this message because you are listed as the Registered Name Holder
or Administrative contact for this domain name in the WHOIS database. Please read
the following important information about transferring your domain name:

You must agree to enter into a new Registration Agreement with us. You can review
the full terms and conditions of the Agreement at:

http://<Web address>

Once you have entered into the Agreement, the transfer will take place within five
(5) calendar days, unless the current registrar of record denies the request.

After a transfer takes place, you will not be able to transfer to another registrar
for 60 days. (With the exception of a transfer back to the previous registrar, in
cases where both registrars so agree or where a decision in a dispute resolution
process so directs.)

=====
IMPORTANT: If you do not respond, the domain names listed above will not be
transferred to us.
=====

TO PROCEED WITH THE TRANSFER, you must:

Go to https://<Web address>

*** NOTE: if clicking the link does not work, please type the ENTIRE link into your
browser ***

You will be asked to provide the following codes in order to process this domain
transfer. Please copy and paste them into the corresponding fields when asked:

Transaction ID: <##TRANSACTIONID##>
Security Code: <##TRANSFERKEY##>

If you DO NOT WANT the transfer to proceed, then don't respond to this message.

If you have any questions about this process, please contact us by email at
<email address>, or by phone at <phone number>.

Regards,
Domain Services
```

Authorizing a Domain Transfer to Your Account

Your domain transfer will not succeed unless you unlock the domain, remove privacy, set up a valid administrative email, and apply the correct authorization code(for domain names that require one).

To Authorize a Domain Transfer to Your Account

1. Log in to your Account Manager.
2. In the **My Products** section, click **Manage Domains**. The Domain Manager displays.
3. From the **Domains** menu, select **Pending Transfers**.
4. Click the **Authorization** button, and then click **Begin Transfer Authorization**.
5. In the **Transaction ID** field, enter the transaction ID from the email notification we sent regarding the domain transfer, and then click **Next**.
6. In the **Security Code** field, enter the security code from the email notification we sent regarding the domain transfer, and then click **Next**.
7. If applicable, enter the **Authorization Code** that you received from the current Registrar and click **Continue**.

Troubleshooting Domain Transfers

- **Authorization Code (Auth Code)** - For domains that require one, the customer must obtain an Auth Code for the transfer from the losing Registrar and enter it in the transfer confirmation page. ([For information on Authorization Codes see page 2.](#))
- **Awaiting Response** - The gaining Registrar must receive a response from the Administrative (Admin) Contact within 30 days. If you have not received a confirmation email, verify that the Admin email address is valid. ([See an example confirmation email on page 3.](#))
- **Failed Transfer** - The domain is locked, expired, or was registered or renewed within the last 60 days and therefore cannot be transferred at this time. If your domain is locked, you must contact your current registrar to unlock it before the transfer can be completed.
- **No Response / Late Response** - The losing Registrar must receive a response to the transfer confirmation email within their allotted timeframe.

For more information about transferring domains or authorization codes, please visit our Help Center or contact the Customer Support department.
